About This Game

Finque is stuck in a dream and trying to get out of her dream-world. 'The Eye' says he is the only one who can get her out. Finque has no choice and needs to follow his steps.

Welcome to Finque's Dream-World

This world has its own laws of physics. "As long as you step on something, you'll never fall." says The Eye. Everything in this world is actually normal in this world but it doesn't look normal to Finque. She doesn't even know what 'normal' is. She will ask so many questions while trying to get out of this world.

Finque's Skills

The Eye gives her 4 skills. Finque will use them to find her way-out but she often gets confused. Finque finds this world hard to understand.

Title: Finque
Genre: Adventure, Casual, Indie
Developer:
Möf Selvi
Publisher:
Anatolian ODS
Release Date: 11 Nov, 2016

a09c17d780

Minimum:

OS: Windows XP SP2 or later

Processor: 2.0 GHz Dual Core Processor or higher

Memory: 2 GB RAM

Graphics: DX9 (shader model 3.0)

DirectX: Version 9.0c

Storage: 45 MB available space

Sound Card: DirectX Compatible

English,Turkish

Finque is a really fun puzzle game with nice mechanics and a great story! I am looking forward to future levels :-) It runs beautifully on my Linux boxes :-). I cannot recommend this game at its current retail price. TL;DR somewhat simplistic, needs polish, buy it on sale if at all. To the dev, I recommend lowering the price to \$2.99.

YOU CAN ZOOM OUT. I'm putting that there so the preview of this review shows it to any potential customers. Use the scroll wheel to zoom out to a distance that makes sense for you. Unfortunately, when the player gets covered up by the level geometry, it snaps back to "Behind-the-Head-O-Vision," which is incredibly annoying. I wish the default was the Zoomed Out view, and the player would silhouette through the geometry. Super Mario 3D World is a good example, where when you were obscured you would appear as a colored shadow on all the geometry, though it's common in a lot of games.

The mechanics are interesting but lack polish. The "Vacuum Tubes" need some indication of which direction they're going, in my opinion. I agree with other reviews that say that my instincts that Space is Jump leads to many deaths.

Which reminds me, Please raise the killZ floor or whatever it's called in Unity. I know I've made a mistake, I don't need to fall past the stars for a good solid 30 Seconds or whatever. When you fall to your death, you just have to sit and wait for the restart, which only promotes a fear of taking risk, and there is some fun to be had taking shortcuts.

I don't know if I haven't gotten far enough to hear new music, but please make it change in some way. I would say having a few different tracks for each "section" of the game would be nice, so that if you're constantly having to restart the level (ie from dying which happens a lot) you don't just keep hearing the same 30 seconds of music over and over and over and over and over and over and over and over and over and over and over and over and over and over and see how annoying that was?

It's an interesting title, but I can't say it's entirely fun. It's actually kind of boring. I don't think it's worth \$10 dollars. I got it on sale for \$3.49 and I'm regretting spending that much. This could be a good game, it just needs a lot more work. This almost seems like a tech demo or an alpha version.. Would rather buy WinRAR. Bad game. Recommending it just so this game gets bought by more people and more people have to suffer.. I was really conflicted about whether or not this game deserves a thumbs up.

In my opinion, the amount of cons outnumbered but did not outweigh the pro's, read below why. I'd say: if you can live with the cons listed below, by all means do check out the game.

Pro's:

- Really cool creative puzzle mechanics! Takes a while to get your head wrapped around it.
- Soft colours, nice simplistic art style and music.
- Philosophical messages in between the levels.
- After playing a while, you learn how to take 'shortcuts' in the game, entering sections at weird angles and getting away with it.
- This whole game is made by one person.
- Cheap game, and it will probably take a couple of hours to finish it.

Cons:

- Everytime after I flipped the world, I couldn't move my mouse right away after the landing, it'd snap right back into front view position before I could look around properly. In a game like this, that is a big disadvantage and very annoying.
- WHY is spacebar the 'turn the world upside down' button? How many times I instinctively tried to jump and instead flew off into oblivion...
- No rebinding keys.
- The mouse sensitivity is way too low!

- The camera angle: it's hard to tell what's right below you and when you flip the world it's disorienting.
(- It doesn't tell you how many crystals you need to collect per level. Can be annoying at times.)
(- Little spelling errors in English.)
(- When I started the game a while ago, the achievements didn't work. These are now added.)
(- I still don't understand the use of the Special Tube... except that one time I randomly drifted into space, created a Special Tube, steered myself towards it and it dragged me right back into the level.)

Thanks for reading, I hope this has been of some help to you.
