In this review we have tested a Project 64 1.7.0.49 (Project 64k) version which was uploaded by a user who has given me permission to use his version of the game. "test" and "test1" have been created by the same user (Kamil). Unfortunately due to fast-changing software technology is not possible to keep the game's database up to date. We can advise you to download the latest version. However since the latest version is a prerelease version (bootleg), we have decided to make a review of the real final version. The bootleg version is not only not working and buggy (so it is very likely that it contains malware).
